

THE CLAIMS

1-19. (canceled)

20. (previously presented): A portable handheld computing device comprising:

a casing having a base and a lid that opens and closes relative to the base, the lid having an upper surface, opposing side surfaces, and opposing end surfaces; and

a light emitting device mounted externally on the casing, the light emitting device being activated upon occurrence of an event to notify a user, positioned on the upper surface of the lid, and wrapping around to one of the end surfaces so that the light emitting device is visible from both opposing side surfaces and both opposing end surfaces when the lid is opened or closed.

21-47. (canceled)
